Quick Access

- Quick Links Carousel for the most-used features, right on the home screen

Ultimate Wi-Fi

+\$6.95
/mo

Advanced security, parental, and performance tools

Everything from
Basic Managed Wi-Fi, PLUS...

ProtectIQ (Whole-Home Cybersecurity)

- Protects every connected device on the network—if it's connected, it's protected
- Proactively monitors incoming traffic and automatically blocks suspicious activity
- Blocks known-harmful websites before they load
- Uses a constantly updated threat database (refreshed weekly) with intrusion prevention (IPS)
- Stops malicious payloads before they reach a vulnerable device
- Sends alerts when a threat is detected, including device, source

ExperienceIQ (Enhanced Parental Controls)

- Blocks inappropriate content categories (e.g., violence, adult content)
- Blocks specific apps or sites by name (games, social media, etc.)
- Sets daily time limits per application
- Enables Safe Search and YouTube Restricted Mode (also filters comments)
- Shows usage history per profile so families can see how the internet is used
- Sends notifications for parental control activity

MyPrioritiesIQ (Smart Bandwidth Prioritization)

- One-tap modes to prioritize traffic for Work, Gaming, or Streaming
- Ensures video calls, gaming, or entertainment get the bandwidth they need, when they need it
- Set schedules so priorities shift automatically (e.g., work traffic during the day, streaming at night)

Questions? Call us at (701) 344-5000

Every internet package includes free professional installation and Basic Managed Wi-Fi. Ultimate Wi-Fi is an optional upgrade (\$6.95/mo.) that adds three advanced tools for security, parental controls, and network performance.
